

Kristal Farms — Partner Cost Advantage

Cost index model for partner conversations. Conventional remote compute = 100; Kristal Farms the same scale with avoided costs as a savings gap.

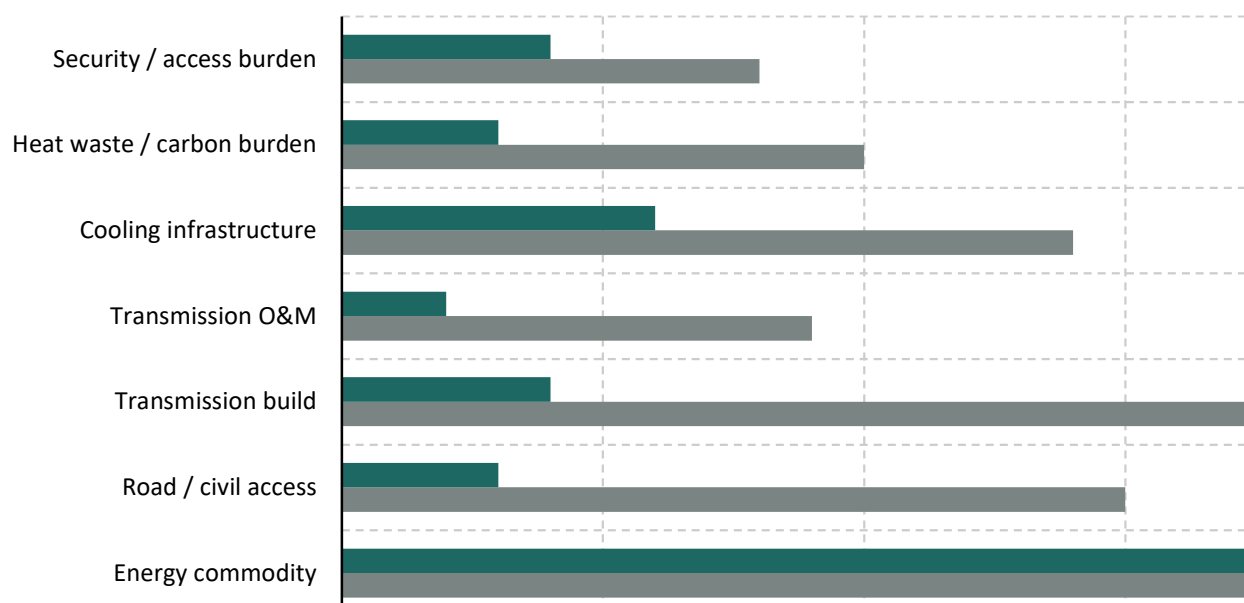

Partner message

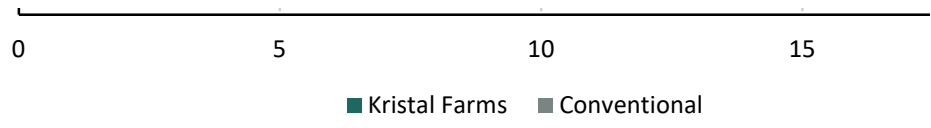

- 1 Kristal Farms lowers cost by removing infrastructure layers, not only by buying cheaper electricity.
- 2 The largest savings come from avoided roads, avoided long transmission, lower cooling burden and heat reuse.
- 3 Partners can validate the assumptions and convert this index model into a site-specific financial case.
